Question Paper Code : 40472

B.E./B.Tech. DEGREE EXAMINATIONS, NOVEMBER/DECEMBER 2024

Fifth/Sixth Semester

Computer Science and Engineering

CCS 371 – VIDEO CREATION AND EDITING

(Common to : Computer Science and Design/Computer Science and Engineering (Artificial Intelligence and Machine Learning)/Computer and Communication Engineering/Artificial Intelligence and Data Science/Information Technology)

(Regulations 2021)

Time : Three hours Maximum : 100 marks

Answer ALL questions.

PART A — (10 × 2 = 20 marks)

1. List any two benefits of using digital video in modern filmmaking.

2. Assess the impact of non-linear editing on storytelling techniques in contemporary films.

3. If a jump cut is used to break continuity, hay, might it ironically add clarity to a scene's emotional message?

4. Compare consumer and professional NLE systems in terms of features and flexibility.

5. Outline the purpose of importing audio into a video editing project.

6. Compare the processes of exporting video to a digital file format versus exporting it to tape.

7. Define the purpose of importing audio in a video editing workflow.

8. Assess the role of audio adjustments in improving video quality in Final Cut Pro.

9. List two basic tools available in Avid Xpress DV 4 and their primary functions.

10. Compare the processes of importing video files versus logging footage for a project.

GRACE COE

PART B — (5 × 13 = 65 marks)

11. (a) Discuss the concept of "Economy of Expression" in filmmaking. Explain how it can be applied in a modern film scene to convey complex emotions or ideas effectively.

Or

(b) Analyze the role of non-linear digital video editing in improving the storytelling and creative flexibility in films. Compare non-linear digital video editing with linear editing, citing specific examples from well-known movies to highlight the differences.

12. (a) Explain various storytelling styles used in digital editing, including jump cuts, L-cuts, match cuts, and dissolves. Discuss their impact on the viewer's experience.

Or

(b) Interpret the role of media management and pointer files in a digital editing setup. Also, infer how do these elements contribute to an organized and efficient editing environment, particularly in high-resolution projects.

13. (a) Explain how to capture analogue video and convert it into a digital format for editing and distribution. Outline the steps and equipment needed, as well as considerations for maintaining quality.

Or

(b) Summarize a step-by-step process for a video project that includes capturing digital video, importing external audio and exporting to both digital files and CDs.

14. (a) Describe the process of working with clips, sequences, and the Timeline in Final Cut Pro, highlighting how each component contributes to the overall editing workflow.

Or

(b) Evaluate the use of media tools and user preferences in Final Cut Pro to enhance workflow efficiency. How do these settings and tools contribute to a more organized and manageable editing process?

15. (a) Describe the workflow for starting a project in Avid Xpress DV 4, from project creation to the first edit. Also, highlight the key features of the Project Window and how they facilitate project management.

Or

(b) Imagine you are tasked with editing a documentary using Avid Xpress DV 4. Develop a comprehensive plan that includes logging footage, organizing media with bins, and utilizing the Timeline and trim mode to create a cohesive narrative.

GRACE COE

PART C — (1 × 15 = 15 marks)

16. (a) A group of students is working on a final project for their film class, using Final Cut Pro to edit their footage.

(i) Develop a guide for them on effectively using Canvas and Viewer for editing their project, including tips on arranging sequences and adjusting clip settings. (5)

(ii) Discuss how they can utilize advanced editing techniques, such as colour grading and sound design, to elevate the quality of their final presentation. (5)

(iii) Suggest a plan for reviewing and refining their edit before submission, including how to gather feedback and make necessary adjustments. (5)

Or

(b) You are tasked with creating a music video that requires synchronization of audio with dynamic visual edits.

(i) Explain the steps you would take to import video files and organize them in bins effectively. (5)

(ii) Discuss how you would use Avid Xpress DV 4's basic editing tools to align the visuals with the music track. (5)

(iii) Evaluate the potential challenges you may face with audio synchronization and how you would address them during editing. (5)
